LECTURE (in German)

"The first Republic in Portugal from 1910 to 1926" by Georg Cabral

Exactly 111 years ago, on 5 October 1910, the First Republic was proclaimed in Portugal, only the third republic in the Europe of monarchies. How did it come about after three quarters of a millennium of monarchy? What were the goals of the republican politicians and why was it overthrown as early as May 1926 and a dictatorship began that lasted almost 50 years?
